Eurol Additive-S Diesel

Diesel fuel additive for maintaining the entire fuel system

Description:

Eurol Additive-S Diesel is a mix of specially selected Eurol Syngis additives. It has been developed as a diesel fuel additive for the maintenance of the entire fuel system and works preventively against corrosion and condensation in the fuel tank and fuel lines. Use is recommended to remove and prevent diesel engine pollution. Eurol Additive-S Diesel ensures a smoothly operating diesel engine, a better start, less emissions, lower fuel consumption and more power. It does not contain chlorine.

Instructions for use:

- First replace heavily polluted fuel filters
- 1000ml Eurol Additive-S Diesel is suitable for 1000L of diesel fuel
- Add before refuelling to ensure a homogeneous mixture of additive and fuel
- Let the additive circulate through the system to enable proper functioning
- Repeat every 2 to 3 fuel refills

Eurol Additive-S Diesel has the following characteristics:

- For heavily loaded diesel engines in e.g. earthmoving equipment, ships and generators
- Environmentally friendly and safe in use
- Reduces vibrations and noise
- Reduces fuel consumption
- Increases power output
- Free from chlorinated paraffins
- Economical in use

Physical properties:

Colour	Amber		
Density at 20°C	0.945	kg/l	ASTM D 1298
Flash point	76	°C	ASTM D 93
Pour point	-39	°C	ASTM D 97

Additives - Fuel - S008320
Version 1.0, 22-01-2018

This sheet contains recommendations or suggestions on properties and possible applications of Eurol products. Because of continuous product research and development, the information in this document can be changed at all times, without foregoing notice. The analytical information in this document consists of typical incorrectness of the text. The reader is advised to make the final product choice in dialogue with the supplier.
